BIG, BOLD and brilliant, the fourth generation of Subaru's Outback is better than ever.

The Japanese-made car is longer, wider and taller than ever before and, inside, the cabin perfectly complements the latest Outback's muscular exterior lines. There is a feeling of spaciousness and the large leather seats offer excellent support. Behind the wheel, a revised instrument cluster features four dials outlined in aluminium rings, and the steering wheel is leather-wrapped, with integrated audio and cruise controls. On the technology front, the apparent lack of a USB port shows the Subaru to be a little behind the times as far as iPhone-style connectivity goes, but the six speaker

stereo is MP3-compatible. A Bluetooth hands-free and sat-nav system is also fitted.

On the road, the Outback has decent handling and stability. It is not slow off the mark and the presence of its All-Wheel-Drive (AWD) system reassures you that it is safe and sure-footed in all weather conditions. The 1998cc diesel engine, which is linked to a rather notchy six-speed manual gearbox, produces a maximum of 148 bhp and has a top torque figure of 258 lb/ft. It is also surprisingly economical; during the time I had the Subaru, my trips consisted of speedy motorway commutes and rugged rural routes. I didn't get the claimed average of 47.8 mpg, but I got a consistent 35+ mpg, which is still not bad for a 4x4.

On the practical front, the rear seat backrest is split 60/40 and folds flat to offer the best people/cargo carrying versatility. The tailgate is also nice and wide for easy loading; but what really makes the Outback such a good workhorse is its self-levelling suspension. Not

only does this guarantee the Subaru to be a good load-lugger, it also helps it to be a great towcar.

Pros 'N' Cons

- Comfortable
- Great Grip
- Spacious
- Good towcar
- Notchy gears
- No USB port

Fast Facts

- Max speed: 120 mph
- 0-62 mph: 9.7 secs
- Combined mpg: 47.8
- Engine: 1998 cc 4 cylinder 16 valve (Boxer Diesel)
- Max. power (bhp): 148 at 3,600 rpm
- Max. torque (lb/ft): 258 at 1800-2400 rpm
- Max. towing weight (braked) 1700 kg
- CO2: 155 g/km

Price: £30,070 on the road on the road
