

Bentley *Flying Spur*

The reality is that you probably won't drive this Flying Spur; you're more likely to hire a chauffeur to pilot it for you. That's because, if you're a high rolling businessman – or woman – you'll want to turn up at meetings as relaxed as possible.

And stress-free you will be if you kick back in the Spur. The seats mould themselves around you; the car is big enough for four adults, and the world will pass you by silently – thanks to the superior sound proofing.

Powering the Flying Spur is a 6.0 litre, twin turbo, 12-cylinder engine, coupled to an eight-speed automatic transmission. Developing eyeball popping pulling-power, the Bentley sprints from 0-62mph in 4.6 seconds and it is capable of a licence-losing 199mph. However, this rate of knots is harnessed well. You see, power is delivered to the road via all-wheel drive. This gives you a sure-footed, engaging driving experience in all road and weather conditions.

As well as high levels of comfort and refinement, Bentley's styling team has

developed an athletic design for the Flying Spur that brings together time-honoured icons, such as the celebrated winged "B" badge and up to date details, such as monumentally large twin exhaust tailpipes.

Step inside the cavernous cabin and it is immediately apparent Bentley's interior designers have gone to town on ensuring a lavish, yet hi-tech environment. Advanced acoustic and electronic technologies are seamlessly harmonized with hand-crafted leather hides and wood veneers.

The Bentley's interior treats include an eight-inch central touchscreen with optional TV tuner, a 30 GB on board hard drive and a wi-fi router. However, as the car has been made as much for discerning passengers as for the person behind the wheel, rear seat leisure is where it really counts.

There's an entertainment suite and a custom-built hand-held touch screen remote which allows anyone sitting in the back to control features from the comfort of their seat. What's more, an eight-speaker audio system provides high quality sound clarity.

The Bentley Flying Spur has got to be the choice of car for anyone who appreciates exquisitely appointed cars. Needless to say, it makes you a star just by sitting in it.

FAST FACTS

Max speed: 199 mph

0-62 mph: 4.6 secs

Combined mpg: 19.6

Engine: 5998 cc 12 cylinder 48 valve turbo-petrol

Max. power (bhp): 616 at 6000 rpm

Max. torque (lb. ft.): 590 at 2000 rpm

CO2: 332 g/km

Price: £154,900
